Language lab and Bridge Course-Remedial Coaching  
Class (2022-2023)

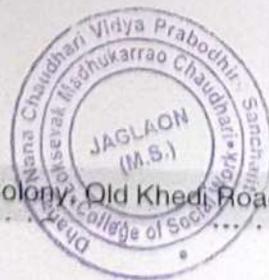

**Remedial Coaching classes on Basic English Grammar and Spoken English** are important for students who are from tribal and rural backgrounds; the fact is that our institute has more than 80% students from these areas. Every year we observe that the majority of the students are weak in their communication skills and English Language, so to improve these skills, we conduct Remedial classes. The programme is open to all students every year more than 50 students participate in remedial coaching class.

**Objectives:-**

1. To inspire and assist the academically underachieving pupils in realizing their shortcomings and assisting them in improving.
2. Enhancing pupils' academic performance across a range of areas.
3. Increasing their level of understanding of foundational areas to give them a stronger foundation for future academic work.

**Language lab:** at present, the language lab is under construction, but with updated software, it will be ready in the next academic year. So using traditional methods and available resources, the basics of English grammar were taught to students and encouraged them to listen to various podcasts to improve their listening skills, which helped them learn the language.

A remedial spoken class was organized between 5 September, 2022 to 13 September, 2022 in which various difficulties faced by the students in learning the English language were solved through discussion and groups were formed to give them practice speaking.

**Language lab and Bridge Course-Remedial Coaching  
Class (2021-2022)**

**Remedial Coaching classes on Basic English Grammar and Spoken English** are important for students who are from tribal and rural backgrounds; the fact is that our institute has more than 80% students from these areas. Every year we observe that the majority of the students are weak in their communication skills and English Language, so to improve these skills, we conduct Remedial classes.

**Objectives:-**

1. To inspire and assist the academically underachieving pupils in realizing their shortcomings and assisting them in improving.
2. Enhancing pupils' academic performance across a range of areas.
3. Increasing their level of understanding of foundational areas to give them a stronger foundation for future academic work.

**Language lab:** at present, the language lab is under construction, but with updated software, it will be ready in the next academic year. So using traditional methods and available resources, the basics of English grammar were taught to students and encouraged them to listen to various podcasts to improve their listening skills, which helped them learn the language.

A remedial spoken class was organized between March 21 and April 18, 2022, in which various difficulties faced by the students in learning the English language were solved through discussion and groups were formed to give them practice speaking.
